

HOME APPLIANCES ENERGY CONSUMPTION

Energy usage chart by Repair Aid

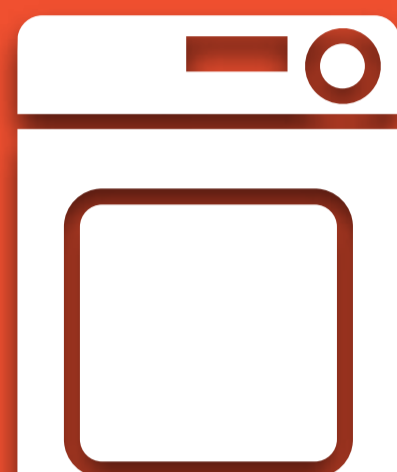

KWH

Washing Machines and Washer Dryers

Average Power Rating: 1200-3000W

Tumble Dryers

Average Power Rating: 2000-3000W

Electric Ovens

Average Power Rating: 2000-2500W

Microwave Ovens

Average Power Rating: 800-1500W

Dishwashers

Average Power Rating: 1200-1500W

Fridge Freezers

Average Power Rating: 200-400W

Please note,

the amount of electricity an appliance actually uses depends on how long it is turned on for.

So the fridge freezer has a low power rating of about 200W, but because it's on all the time it uses a lot of electricity over the whole year.
